PUBLIC PROGRAMS AND
MINNESOTA'S DEVELOPMENT REGIONS

Part I:
Atlas of Programs and
Service Areas

Prepared for the
Minnesota State Planning Agency

by
The Center for Urban and Regional Affairs
University of Minnesota - Minneapolis

1973

The preparation of this report was financed in part
through a comprehensive planning grant from the
Department of Housing and Urban Development as authorized
by Section 701 of the Housing Act of 1954, as amended.

Preface

The information in this report was compiled for the Regional Development Commissions in the State of Minnesota. The report attempts to place in both organizational and geographical perspective the multitude of governmental and private programs, plans and services directed toward economic development, resource development, and human services in the state. It is hoped that this perspective will help the Commissions in the development of their work programs.

This overall project was coordinated by Thomas Anding, Associate Director of the Center for Urban and Regional Affairs at the University of Minnesota.

The work and planning on the economic development and resource development section was done by Ben Sharpe, graduate student, Geography Department, University of Minnesota.

The work and planning on the human services section was done by Steve Pontius and Karen Solheim, graduate students, Geography Department, University of Minnesota.

All who worked on the project are much indebted to many personnel of state and local government offices as well as many private organizations who provided material. Special thanks go to Mr. James Solem of the State Planning Agency.

Final maps were prepared by Sandra Haas, Cartographic Laboratory, Department of Geography, at the University of Minnesota.

John R. Borchert
Professor and Director

Introduction:

This guide takes three areas of government and private sector participation in the social-economic arena and shows the range of programs and delivery services which are interrelated within each. The areas are Resource Development, Economic Development and Human Services. Within each of these three areas there are a multitude of programs and delivery services which cover all or part of the state, directed separately or jointly by various federal, state, local or private agencies. In an attempt to place these programs and delivery services into a geographical and organizational perspective for the Regional Commissions, each of the three areas were divided according to program areas and/or problem areas and mapped. Regional development boundaries were superimposed when appropriate. Such a procedure should better enable the Regional Commissions to view the coverage of the various programs and delivery services under their jurisdiction. Forthcoming will be another guide focusing on different techniques that can be used to determine needs and priorities within economic development regions.

Since many programs and delivery services, particularly in the Human Services area do not require licensing at this time, it was impossible at the state level to locate all of the private agencies involved. Therefore, the coverage of many programs and delivery services is not complete in this guide. In addition, many programs and delivery services are either being expanded, changed or phased out, and thus the accuracy of the maps is a function of the date for which the data were available. While these factors are important and should be underscored by the reader, the usefulness of the overall structure of this guide remains because the program areas and/or problem areas will continue to be important. Thus, these data should be considered the initial effort in an examination of programs and delivery services that serve each region in the state.

RESOURCE DEVELOPMENT

I. Land Quality

a. Public Data

1. Land Ownership and Value
2. Structure Support
3. Agricultural-Forest Productivity
4. Irrigability
5. Climate
6. Forest Cover
7. Slope Relief
8. Current Use
9. Accessibility

b. Analysis

1. Existing Plan
2. Qualitative Analysis-Protection
3. Public Control Powers

II. Water Quality

a. Management Responsibility

1. Drainage
2. Sewers
3. Water Treatment
4. Lakeshore Zoning
5. Floodplain Zoning
6. Cropland Zoning
7. Forest Management
8. Feedlot Waste
9. Solid & Air Waste Quality
10. Monitoring

RESOURCE DEVELOPMENT PRIORITIES

Table 1. Dispersal of Resource Development Functions Among Different Agencies of the Public

(Numbers in boxes refer to specific responsibilities described in Notes to Table 1, pp. 5 - 7. For additional data on bases for setting priorities, see the appropriate maps.)

Notes to Table 1. Brief Description of Agency Tasks and Responsibilities
in Resource Development

- I. Local Public Agent
 - 1 - Comprehensive plans prepared for municipalities.
 - 2 - Land use zoning and subdivision controls.
 - 3 - Zoning enforcement powers.
 - 4 - County assessor's data
 - 6 - Comprehensive county plans.
 - 8 - Counties must submit a comprehensive sewer and water plan to the Health Department.
 - 9 - Counties are required by law to zone lakeshore.
 - 10 - Counties are responsible for floodplains outside of incorporated municipalities.
 - 11 - Counties have the power to regulate use in county forests.
 - 12 - Municipalities have the basic responsibility to build and operate sewage facilities.
 - 13 - Municipalities have financial responsibility for construction and operation of water treatment facilities.
 - 14 - Municipalities are responsible for floodplains within their corporate limits.
- II. University of Minnesota
 - 15 - Detailed soil survey data for many counties.
 - 16 - Data on land productivity through Department of Soils Science, School of Forestry, and North Central Forest Experiment Station (Waseca).
 - 17 - State climatologists office and archives.
 - 18 - State Soils Atlas - Division of Soils Science.
 - 19 - Central data bank of all census population data for census enumeration districts, minor civil divisions, and larger units.
 - 20 - Overall Economic Development Plans prepared for counties.
 - 21 - Central data bank on location and use of all federal, state, and county owned 40's and Government lots in Minnesota.
 - 22 - Central data bank for slope and relief data acquired in current and future highway site and location studies; currently covers shore zones of all lakes of 150 acres or more in Minnesota.
 - 23 - Central data bank on location and dominant use of land in every 40 acre parcel of Government Lot in Minnesota, 1969.
 - 24 - Central data bank on land use (see 19).
 - 25 - Analysis and projection of detailed land use data and land requirements.
 - 26 - Data on surface and subsurface geology.
 - 27 - Data on ground water resources.
 - 28 - Included in data on soil conditions.
- III. Mankato State College
 - 29 - Depository of all plans in Region 9.
- IV. Regional Agents
 - 30 - The Southern Minnesota Rivers Basin Commission was created by the 1971 Minnesota Legislature to coordinate river basin planning. The Commission covers 45 counties, including all in Region Nine. The

Commission has held hearings to define issues and reconcile local concerns of basin residents. On this basis, it advises both the legislature and public agencies of local citizen objectives for water resource planning and development.

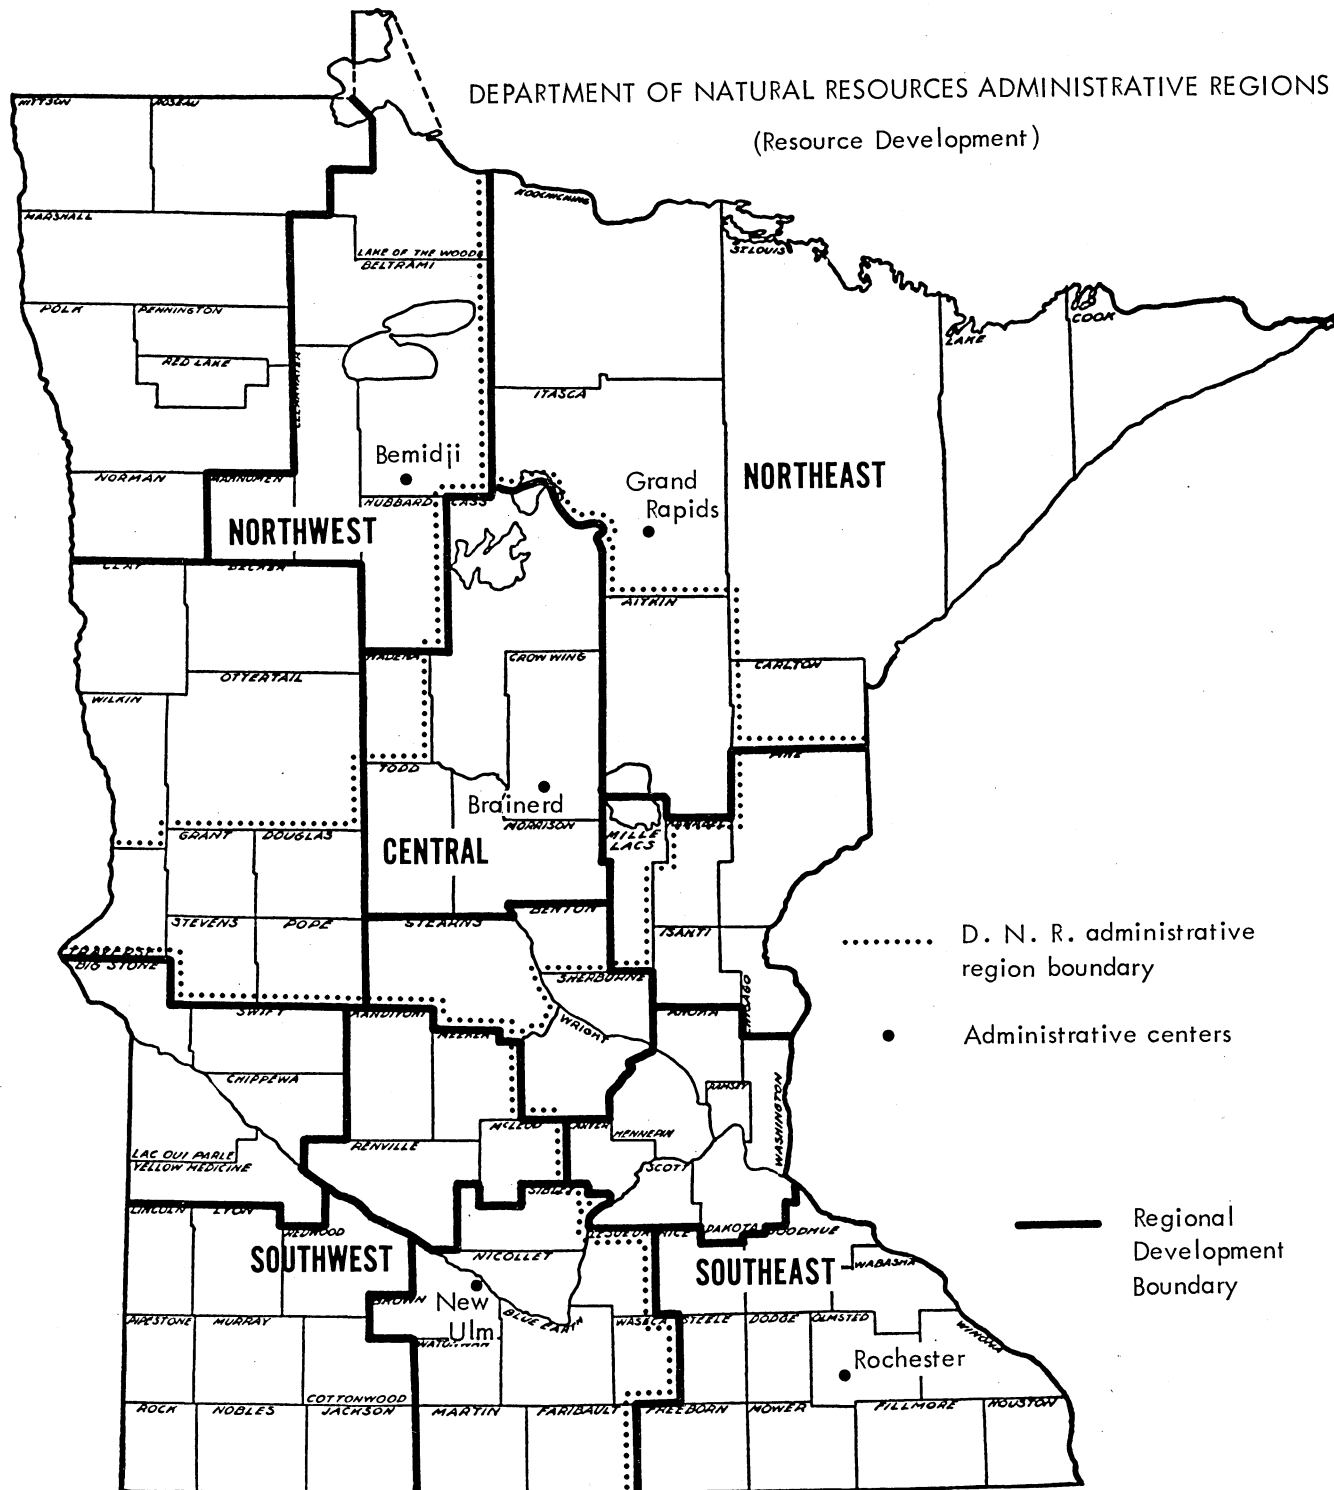

- 31 - The river basin commissions make recommendations on use and management of basin water resources.
- 32 - The river basin commissions make inventories and recommendations for sewers. They also identify major sources of pollution and make recommendations for the Mississippi River and its tributaries.

V. State Agencies

- 33 - Extensive, detailed data on highway use and relation to population.
- 34 - Detailed plans for highway construction and improvement.
- 35 - Control of highway access and right-of-way, including waysides and lakeshore.
- 36 - Forest survey data in Division of Forestry, Department of Natural Resources.
- 37 - Water resources data in the Division of Water, Land and Minerals, Department of Natural Resources.
- 38 - Forest survey data in Division of Forestry, Department of Natural Resources.
- 39 - Control of state forest, park, wayside, game and fish preserve, and access land.
- 40 - Control of stream quality, sewage effluent, solid waste disposal location and practices which affect water quality.
- 41 - Minnesota Pollution Control Agency has identified those towns with sewer systems, requires monitoring of effluent from treatment plants, and recommends allocation of federal funds to aid plant improvement or construction.
- 42 - Pollution Control Agency does inventory of sewage treatment plants and monitoring of effluent, makes recommendations concerning upkeep and/or expansion of facilities.
- 43 - Pollution Control Agency requires County Solid Waste Plans and monitors air quality.
- 44 - Pollution Control Agency does feed lot regulation and monitoring.
- 45 - Department of Natural Resources has the power to review all alterations to lakes of 20 acres and to streams which drain more than two square miles.
- 46 - Department of Natural Resources sets guidelines and reviews local zoning ordinances.
- 47 - Department of Natural Resources sets guidelines and reviews ordinances of floodplains. It attempts to act as coordinator between local units government and information agencies such as Corps of Engineers and Soil Conservation Service.
- 48 - Department of Natural Resources has the power to regulate use in state forests; offers assistance in establishing demonstration woodlands and school forests.
- 49 - Water Resources Board coordinates plans for watershed districts.
- 50 - Health Department monitors quality of water supply and makes recommendations for the improvement (fluoridation, pressure) of them.

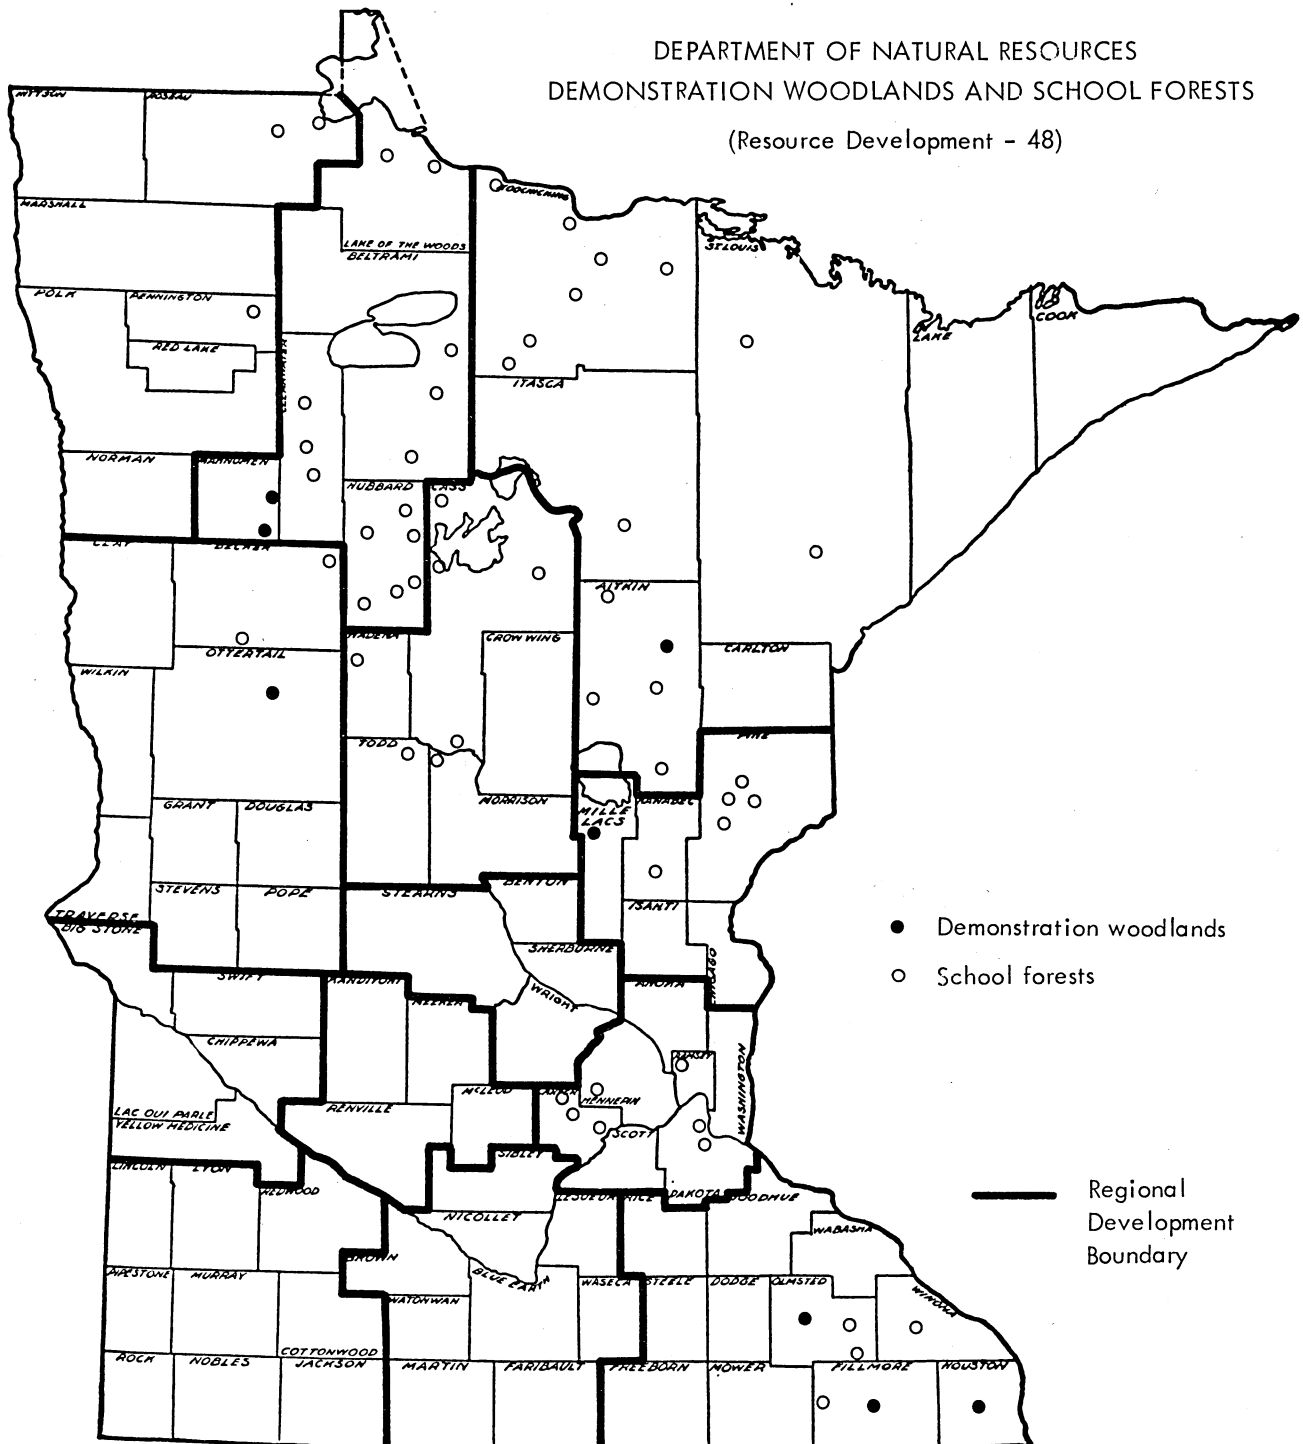

VI. U.S. Agencies

- 51 - River basin development plans.
- 52 - Projections of population and water demand for large basins.
- 53 - Control of discharge into navigable waterways from adjacent land uses.
- 54 - Detailed forest survey data through North Central Forest Experiment Station.
- 55 - Forest survey data, U.S. Forest Service, North Central Forest Experiment Station.
- 56 - Detailed U.S. National Forest Management Plan.
- 57 - Projections of forest yield and timber demand.
- 58 - Control of land use on federal forest lands.
- 59 - Detailed soil data for part or all of most counties.
- 60 - Detailed data on soil porosity and permeability.
- 61 - Slope and relief can be inferred from detailed soil data.
- 62 - Detailed farm plans.
- 63 - U.S. Geological Survey data on ground water and surface water - both quantity and quality.
- 64 - Plans of Department of Defense for changes in installations.
- 65 - Control of land use on federal lands of the Bureau of Sport Fisheries and Wildlife.
- 66 - Bureau of Sport Fisheries and Wildlife works with Soil Conservation Service and The Corps of Engineers to make the improvement of watersheds beneficial to wildlife.
- 67 - Soil Conservation Service provides money and technical expertise to watershed districts and Resource Conservation and Development Areas.
- 68 - Soil Conservation Service provides technical expertise to counties, towns, and Resource Conservation and Development area.
- 69 - Corps of Engineers provides money and expertise for modification of larger watersheds.
- 70 - Corps of Engineers provides technical expertise to cities and towns.
- 71 - Corps of Engineers has some review control and monitoring authority on interstate waters (Navigation Act of 1899).
- 72 - Housing and Urban Development provides money for sewer construction.
- 73 - Housing and Urban Development provides financial grants-in-aid for water treatment plant construction.
- 74 - Housing and Urban Development requires that local governments have floodplain management plan to qualify for HUD insurance.
- 75 - The Forest Service regulates cutting and use in the Chippewa National Forest.
- 76 - Farmers Home Administration provides money to small towns for sewer construction.
- 77 - Farmers Home Administration provides grants-in-aid to small towns for water treatment plant construction.
- 78 - Environmental Protection Agency sets overall standards for the United States.
- 79 - Environmental Protection Agency runs spot checks; special interest monitoring.
- 80 - Environmental Protection Agency makes grants-in-aid to upgrade sewage treatment facilities.

Table 2. Dispersal of Economic Development Functions Among Different Agents of the Public

(Numbers in boxes refer to specific responsibilities described in Notes to Table 2, pp.25-26. For additional data on bases for setting priorities, see the appropriate maps.)

Notes to Table 2. Brief Description of Agency Tasks and Responsibilities
in Economic Development

I. Local Agents

- 1 - Comprehensive plans of municipalities.
- 2 - Promotional meetings or pamphlets.
- 3 - Local industrial development bond issues. Industrial Development Corporations (IDC's) attempt to recruit industry.
- 4 - Local plans and capital improvement programs.
- 5 - County capital improvement programs and comprehensive plans.
- 6 - Municipal and county law enforcement agencies.
- 7 - School district program and plans for capital improvements and instruction.
- 8 - Coordinated capital program and plans for public recreational facilities.
- 9 - Plans and priorities for local road maintenance and improvement.

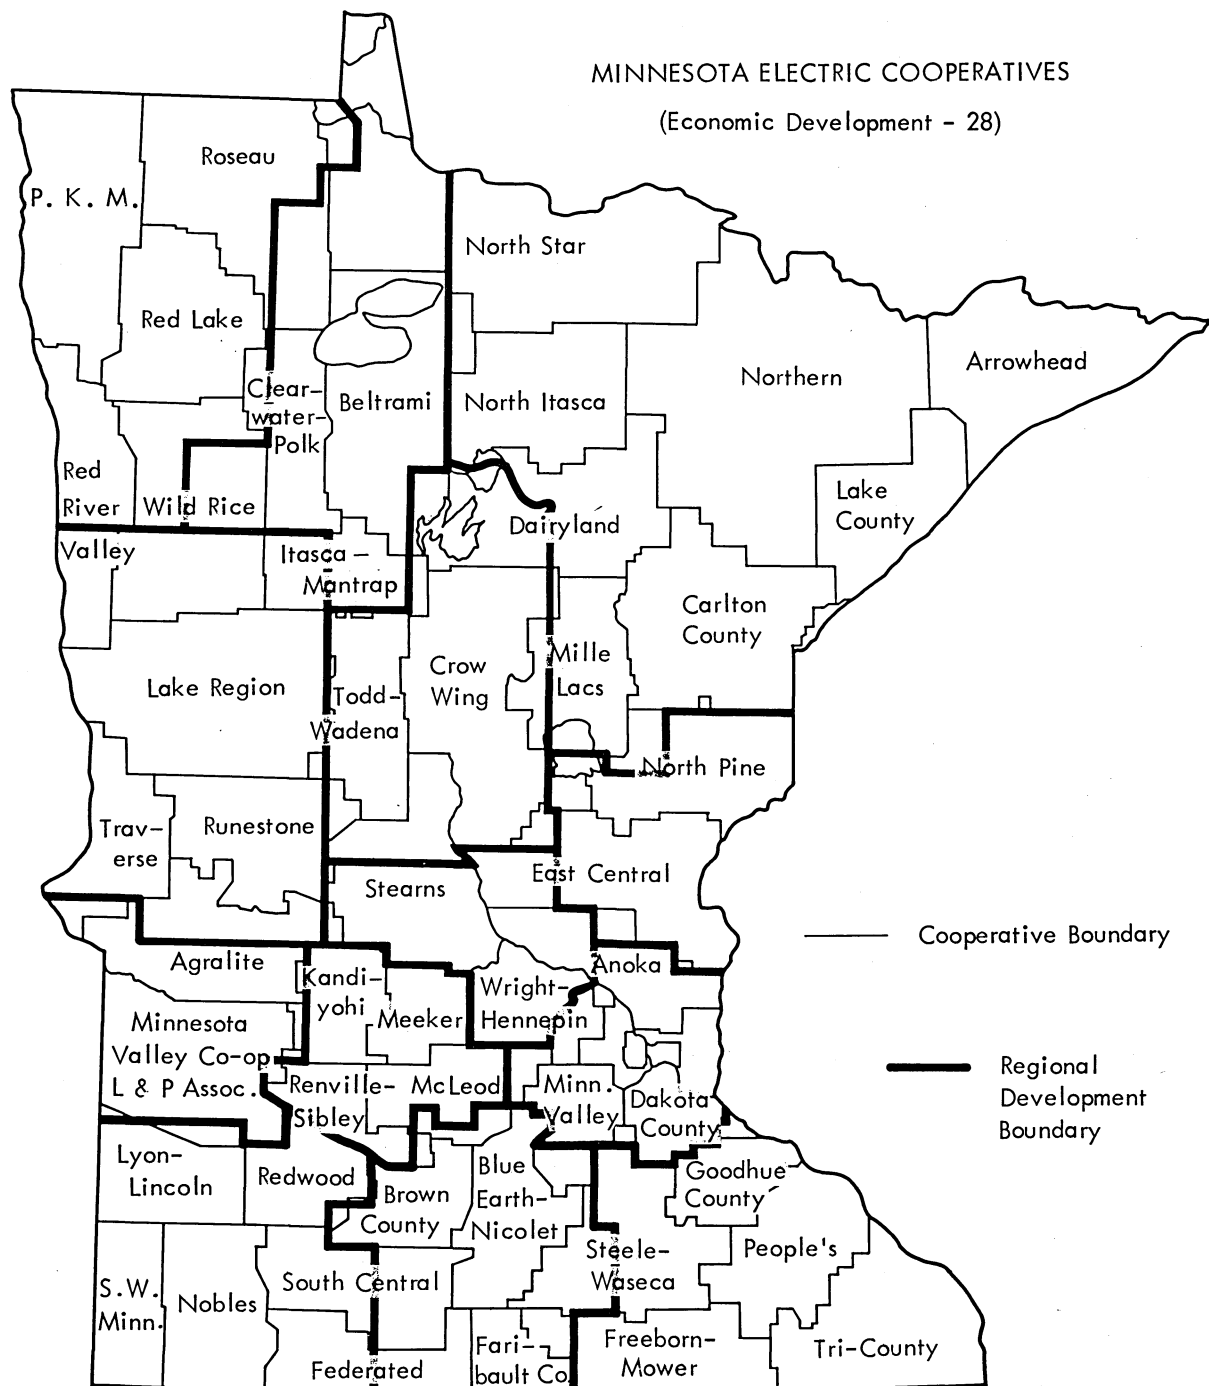

II. State Departments

- 10 - National and regional programs to promote markets for state products, for state tourist attractions, and for Minnesota locations for expansion or relocation of national firms.
- 11 - Planning of outdoor recreational facilities and resource use.
- 12 - Plans and regulations for establishment and operation of water and sewage works.
- 13 - Financial grants-in-aid for improving the training, organization, and equipment of local law enforcement agencies.
- 14 - Vocational training, re-training, and counselling programs; financial assistance; placement services.
- 15 - Grants-in-aid, state-wide requirements, and plans for health, family counselling, day care, and related services for which the demand increases when industrial employment increases.
- 16 - Ownership, maintenance, planning, and improvement of public land. Grants-in-aid to local and regional agents.
- 17 - Planning of primary state-wide and regional highway network.
- 18 - Planning of state systems; grants-in-aid to communities for planning, construction and operation of airports (often with matching FAA funds).
- 19 - Low interest loans to provide or improve housing.
- 20 - Issue charters to interstate bus companies and license all commercial carriers.
- 21 - Intercede on the behalf of communities (at their request) in the event of rail abandonment.
- 22 - Study the statewide need and will be making recommendations on power plant siting.
- 23 - Study the statewide housing situation calling attention to areas of need.
- 24 - Study the transportation network in the state with special reference to future needs and attaining a coordinated network.

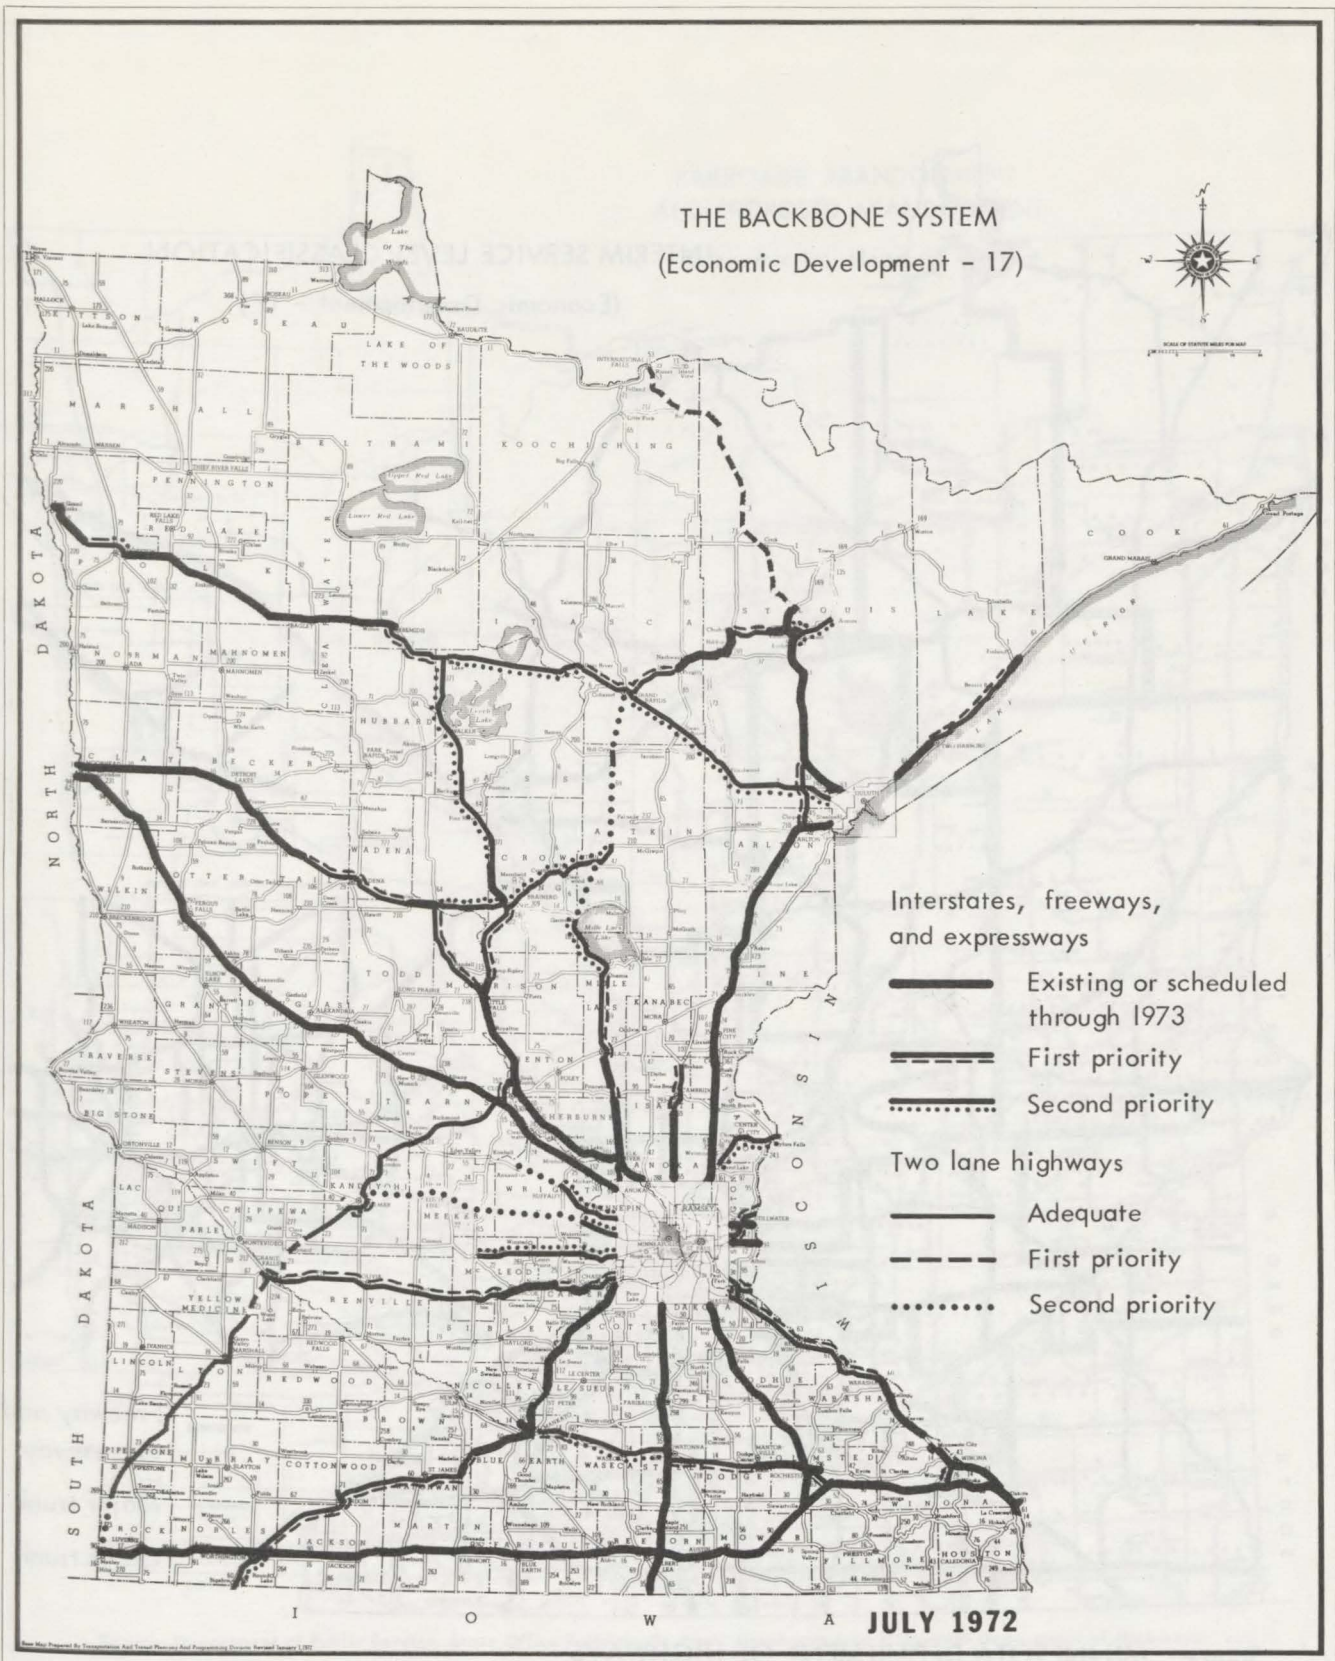

III. U.S. and Interstate Agencies

- 25 - Regional economic surveys and planning studies.
- 26 - Promotional and planning surveys.

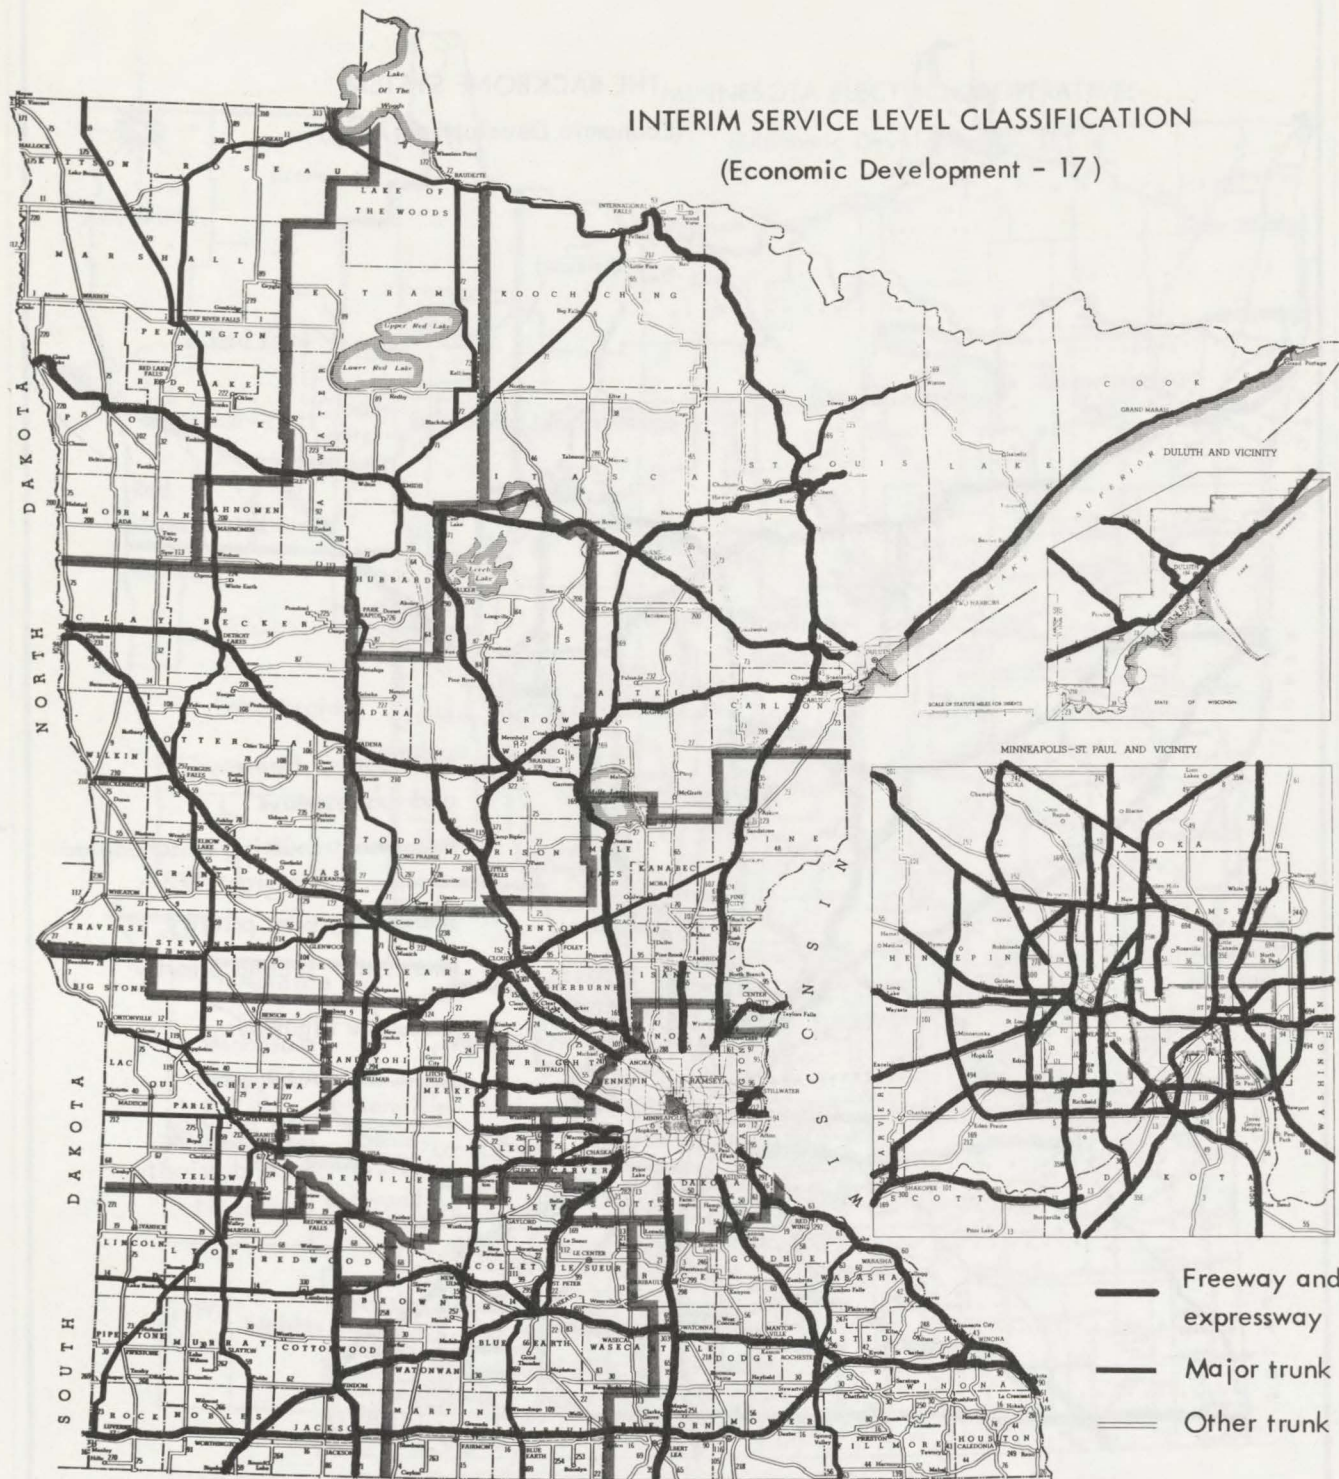

- 27 - Grants-in-aid for regional and local improvements in transportation and utilities.
- 28 - Rural Electrification Administration Cooperatives provide electrical power to rural areas and municipalities under 1,500 in population. Investor-owned utilities operate primarily in the larger municipalities.
- 29 - Railroad companies and scheduled airlines serving the local area.
- 30 - Grants-in-aid for local and regional improvements in housing.
- 31 - Provision of inter-city bus service by several private transportation companies.
- 32 - Insure loans for the improvement of small businesses.
- 33 - Grants and loans made to help farmers buy and improve their operations.

5. Minnesota Department of Highways, Transportation and Transit Planning and Programming Division, Statewide Highway System Construction Priority Evaluation Procedure, November 28, 1972.
6. Department of Aeronautics new statewide plan is due to be completed Fall 1973.
7. Interdepartmental Transportation Task Force, Routes of the Future: the DOT Idea, Jan. 1973.
8. UMRCBS, Upper Mississippi River Comprehensive Basin Study (9 vol.), 1972.

Notes:

a. Planning and programming in the Minnesota Highway Department has changed markedly in the past five years or so. From the Statewide Origin-Destination Study in 1966, an Interim Service Level Classification was derived. A map showing trunk highway needs in 1988 based on projected traffic counts was made in October, 1968. Of special significance is the extensive network of expressways needed. A short range plan, Highway Construction Programs, 1969-73, was also made available to the public at this time. However, due to rising construction costs, and a serious reduction in highway funding due to the utilization of all bond revenues by the end of fiscal year 1973, both the short and long-range plans have been rendered obsolete.

In July, 1972, the Highway Department drew up a long-range plan which they considered financially realistic called the "Backbone" concept. Excluding the interstate routes, the backbone system will cost \$1.2 billion (\$2 billion less than the needs determined by the 1968 interim service level classification, which at projected financing rates, would take 80 years to accomplish). Three factors were utilized in determining a financially realistic plan and a general route priority ranking:

1. To promote outstate economic development.
2. To satisfy travel demands on major recreation routes.
3. To serve the maximum number of highway users.

The first priority routes are estimated to cost \$813 million which at \$40 million a year (with an additional \$15 million annually for stop-gap maintenance on other routes), will take 20 years to accomplish.

Development of the backbone system will require changes in the present way of scheduling projects. The Highway Department presently allocates regular construction funds (excluding interstate) to each of the nine districts on the basis of the money needs and the vehicle-miles of travel within each district. To develop the backbone system in a logical sequence, programming will be on a statewide system basis which will result in major fluctuations in the amount of work in any one district over the life of this program.

At the present time, the Statewide Highway System Construction Priority Evaluation Procedure is a concept rather than a plan. It is designed to be the basis for programming the construction of the backbone system using six quantifiable measures:

1. Economic Development
2. Recreation Usage
3. Road User Benefits
4. Cost-Effectiveness Index
5. Present Road Conditions
6. System Continuity

By using a point system of 0 to 35 points for routes or route segments, the procedure substantially simplifies the priority ranking problem and insures that potential improvement projects throughout the state are rated on an equal basis with all other proposed improvements.

b. The Department of Aeronautics is involved in the design, construction, and operation of all public airports in Minnesota. In terms of planning, the State of Minnesota Aviation System Plan was completed in 1971 and is in the process of being updated at the present time (completion due Fall 1973).

Individual communities can participate in master planning activities - reports of which are completed for Fairmont and pending for New Ulm and Mankato. Master Plans are conducted in four phases: airport requirements; site selection--if a new airport is needed; airport plans; and financial plans. The Department of Aeronautics does not initiate airport activity--the community or local officials must come to the Department for funds to plan, design, and/or construct public airports.

c. The Department of Economic Development's primary function is the promotion of tourism and industry throughout the state. Over 80 per cent of the department's annual budget is utilized for this purpose. Planning, research, and coordination activities are also engaged in by the department. However, no formal plans are proposed or developed for statewide or regional economic development.

MENTALLY RETARDED*

VOCATIONAL REHABILITATION INSTITUTIONAL PROGRAMS

Map of Minnesota showing Vocational Rehabilitation Institutional Programs. The map displays county boundaries and names. Six locations are marked with dots: Brainerd State Hospital, Fergus Falls State Hospital, St. Cloud State Reformatory for Men, Anoka State Hospital, St. Peter State Hospital, and Faribault State Hospital. A legend indicates that a dot represents a State hospital and a larger dot represents a State reformatory for men. The map also shows major lakes like Lake Superior, Lake Michigan, Lake Huron, Lake Erie, and Lake Ontario.

○ City program (Privates in conjunction with the Department of Health)

● Proposed programs (Private)

— Regional Development Boundary

The map displays the state of Minnesota with its county boundaries. A thick black line indicates the Regional Development Boundary. Various counties are labeled, including Itasca, Hennepin, Ramsey, and many others. Symbols are placed on the map to indicate the locations of nutrition programs: open circles for city programs and solid black dots for proposed private programs. A legend on the right side of the map explains these symbols and the boundary line.
